

# Batman: he's going to a hit!

 DARK YELLOW DOSES

Available in october 2017

**NEW**

JP Bral is a livestock farm that has a strong reputation in Flanders for the production of hardy and fattening reproductive bulls. Its strategy is simple: it has been using big BBB on big BBB for more than 30 years! Batman's pedigree is a magnificent example of this: Farouk (+11 cm) on Cyclone (+10 cm) on Colibrie (+5 in the herd), on Arlequin (+10) on Opium, reputed for having made the heaviest cows of the breed.

Batman perfectly takes over the reins from his father Farouk: heavy, no specific origin and very functional. The maternal side boasts at least 5 generations of cows over 140 cm.... not that surprising a feat when you analyse the pedigree and visit the «Van Zeldonck» livestock farm!

# Clinton: presidential class!

YELLOW DOSES

MUSCULATURE

**NEW**

## CLINTON DU FALGI

*(born and bought at Christian Guillaume in Falisolle)*

**BE 4-56621673 / Semence: 15545**

**17 months, 721 kg, 1,34 (+9)**

Né le 21/12/2015

His father Wilmots is an excellent bull, born to an excellent mother, and presented by his owners as the only son of Benhur, who outclasses even his father. He almost featured in the Fabroca catalogue. Not too many regrets however since Clinton has all the qualities of his father without his minor defects.

In addition, Clinton can be traced back to Kacahuète, the only cow purchased by Fabroca to make embryos and his mother Ubidette is a reproductive cow that has raised 5 suckling calves, one of which was kept by Christian Guillaume as a reproductive bull. Ubidette was slaughtered in May 2017 in Anderlecht and had a carcass weight of 654 kg.

# Ganache: a nice big fat variety!

WHITE DOSES

**NEW**

This is the most used bull at the Bois Remont livestock farm this winter! Born on a farm where Gérard Rouard has been cultivating the nice big fat variety for 60 years, in the footsteps of his father and his uncles Rodolphe and Robert Haesevoets (Vyle-Tharoul livestock farm), Ganache is just what we've been looking for over the past few years: a real Fabroca bull ... which is not a descendant of the Fabroca strains and which has only fat in the pedigree. His grandfather, Leader d'Achet, had been bought by Fabroca but was carrying a mutation. Ganache comes from the same lineage as Jongleur d'Achet, who appeared briefly in a Fabroca catalogue in his time. Extraordinary size, incredible length, impeccable correction, big chest, wide withers, big head, large ears and a bevy of big cows on his CV. His father, Résistant, was born in one of the best livestock farms of the breed and weighed 1343 kg. His mother raised 5 suckling calves and sometimes calves naturally. She is always to be seen out in the meadow with her 3 daughters. An overflowing libido and straws produced from the age of 11 months,

**We at Fabroca have big hopes for Ganache!**

## GANACHE D'ACHET

# Kaki: the TOP in terms of economic genetics!

## KAKI DU BOIS REMONT

*(born at Benoît Cassart in Porcheresse and bought at Bruno Denis in Hotte)*

**BE 5-26596411 / Semence: 15522**

**7 years and 3 months, 1245 kg, 1,52 m (+7) ... after 5 seasons of herd!**

*Born on 18/01/2010*

All insemination centres dream of finding tried and tested bulls that are still operational.

Kaki has fathered over 140 naturally calved calves with a loss rate of 5%. His carcass index would be 120 if his calves were born on several farms, his father Jackpot is a reference within the breed, his mother comes from the best Ochain breeding line, his half-brother Nayakou is the top seller at Fabroca and his son Puissant had all the makings of the heaviest of the race!

How do you top that? Too bad that at 7 years ... he will never produce enough semen.

You won't find this very special pedigree elsewhere! The crossing of the largest Flemish and Walloon strains! His father Elrio was born at Luc Defour's livestock farm, a breeder driven by a real passion for heavy genetics. He is an embryo obtained from Eddy De Roo, a breeder who has won 2 of the last 4 editions of the heaviest cow competition in Antwerp ... with Elrio's family. Elrio had 6 sisters on his mother's side: They weighed between 970 and 1207 kg (Antwerp 2013) ... and the daughter of one of these cows with Gitan won at the «vetten os» in Antwerp 2015 with a weight of 1324 kg! Elrio's father is Kooper Borvan, son of Fleur de Saint-Fontaine and grandson of Wilhelmine du Tilleul, two legendary champions of more than 1000 kg. On the maternal side, only cows of more than 1.40m ... we find the famous Véronique de Saint-Fontaine, mother of Iberre, Arabesque d'Yvoir, 1080 kg, first in Libramont and Toison du Peroy. Paquetbot is an all-rounder with good correction, very fertile and his evolution is excellent! We can't wait to see his calves!
